Hi, Rob.

I hope this finds you well.

As you know, Leroy picked up our Pontoon yesterday so I wanted to get you a list of service items that we require. Here they are.

After season engine service

Standard service.

We had to have the spark plugs replaced in early July and it was discovered that swallows had been trying to build a nest inside the cowling. We would like for you to check and make sure that all the material they carried in is removed.

Wind damage to bimini

A couple of weeks ago we were hit but an extremely strong wind gust while moored. The connector at the left rear strut was damaged and will no longer hold. Also we noticed that the two center bars that hold the bimini taught are not holding in place. We need this repaired.

It would be helpful if you could estimate this task in case we need to turn in an insurance claim.

Power wash engine and pontoons

Battery replacement

The battery was dead after about 4 weeks on non-use. Seems to be okay if used every few days.

I am hoping that this can be done next spring so that it doesn't sit all winter not being used.

Inside storage

With delivery next April.

I will be calling you to confirm and discuss further.

Thanks, Rob.

Have a great off season.

937-478-8122

PS. I will be sending a couple of pictures of the bimini issue in a separate email.
